

I claim:

1. A retaining and fixing structure of raised floor holder, comprising:
a holder body having a screw hole thereon;
a pipe cover disposed at a top of said holder body, a retaining groove being
5 annularly disposed on said pipe cover; and
a fixing stud screwed into said screw hole of said holder body, a front end of
said fixing stud being matched into said retaining groove of said pipe cover.
2. The retaining and fixing structure of raised floor holder as claimed in claim
1, wherein said pipe cover has a large-diameter portion and a
10 small-diameter portion, said small-diameter portion being situated below
said large-diameter portion, said retaining groove being disposed on said
small-diameter portion, said small-diameter portion being matched inside
said top of said holder body so that said pipe cover can be disposed at said
top of said holder body.
- 15 3. The retaining and fixing structure of raised floor holder as claimed in claim
1, wherein said pipe cover has an assembly hole thereon, a top plate being
disposed above said holder body, a rod body being fixedly disposed at a
bottom of said top plate, said rod body being matched into said assembly
hole.
- 20 4. The retaining and fixing structure of raised floor holder as claimed in claim
3, wherein said assembly hole is a screw hole, said rod body is a screw rod,
said rod body is matched into said assembly hole by screwing, and said rod
body has a screw nut screwed thereto for fixedly locking it.
- 25 5. The retaining and fixing structure of raised floor holder as claimed in claim
1, wherein said fixing stud has a screw nut screwed thereto.
